- Uniform light distribution

Premium quality

- EyeComfort – light that's easy on the eyes

Control

- Dimmable
- 4 pre-set scenes

Durability

- Long life span up to 15,000 hours

Highlights

SceneSwitch colour change

SceneSwitch Colour Change lets you set the overall mood of a living space at home. Stay focused with cool daylight, be more productive with cool white light or wind down and relax with warm white light. In essence, consumers can control the lights in their home according to their daily activities.

Uniform light distribution

Throw light across your rooms in an even and uniform manner.

EyeComfort

Poor quality light can cause eye strain. With many of us spending time indoors, it's more important than ever to properly light your home. Our products meet stringent test criteria including flicker, strobe, glare, colour rendition and dimming effects to ensure they meet EyeComfort requirements. Philips LED bulbs not only deliver comfortable light, but also stay that way for the duration of their lifespan, delivering consistent light quality, output and colour for more than a decade. Switch

to light that's easy on your eyes. Your eyes will thank you.

Dimmable

Allows you to change the mood by reducing LED brightness levels, from bright white light to a cosy glow – just like traditional lamps.

4 pre-set scenes

Enjoy different ambiances with the convenience of pre-set light scenes for every occasion.

Long life span up to 15,000 hours

Philips LED technology extends your product's lifetime up to 15,000 hours.
