Highlights

Control with your voice

Philips Hue works with Amazon Alexa, Apple HomeKit and Google Home, powered by the Google Assistant, to allow you to control your lights with your voice. Turn your lights on and off. Dim to the desired brightness for a perfect ambiance. Even recall pre-set scenes, change colours and more - all without lifting a finger.

Get in the mood

Use over 50,000 shades of warm to cool white light to put you in the mood to work, play, or relax — no matter what time of day it is. Start your morning off on the right foot with cool, energising bright white light, or settle down for the night with golden tones.

Control lights away from home

The Philips Hue app gives you complete control over your lights, even if you're not at home. Switch your lights off and on remotely using just the app to ensure your home is always lit the way you want it.

Smart lighting for daily tasks

Make your day easier with four preset light scenes that have been handcrafted for your daily tasks. Two cool-toned scenes, Energise and Concentrate, help you get going in the morning and keep your focus, while the warmer scenes of Read and Relax help you enjoy a good book and a rested mind.

The Hue Bridge

The Hue Bridge is an essential component to a personal Philips Hue smart lighting system. It is the brains of the operation, communicating with both your smart light lamps and the Hue app to ensure that everything works together. It also enables smart home automation features like scheduling routines and timers.

Control lights instantly

Get instant control over your Philips Hue smart lights with the Hue dimmer switch. With the touch of a button, your entire household can instantly dim or brighten the room, turn lights on and off, or set light scenes.

Easy, wireless installation

The battery-powered, wireless design of the Hue dimmer switch lets you mount it anywhere with the included adhesive tape. Remove the switch from its wall plate and use it as a remote control or attach it to any magnetic surface.
